PROFILE

Skilled Computer Science graduate with expertise in Flutter for cross-platform applications and backend development using Node.js. Proficient in Firebase, FCM, RESTful APIs, Google Maps, State Management, MVC, and UI/UX design. Strong foundation in Object-Oriented Programming (OOP) with hands-on experience in building scalable and high-performance applications.

EXPERIENCES

Flutter Developer   Software Development Hub | Rawalakot- 2025 - Present

- Developing cross-platform mobile apps using Flutter with clean UI and responsive UX.
- Leading and mentoring internees in mobile development tasks and best practices.
- Collaborating with the team to implement scalable and maintainable features.
- Integrating APIs and optimizing app performance

Backend Developer (Node.js)   Next Gen | 2025 (6 Months)

- Developing backend APIs using Node.js, Express.js, and MongoDB to enhance full-stack expertise..
- Implementing authentication, database management, and server-side logic.
- Gaining experience in JWT authentication, Encryption, API Integration.

Flutter Developer and Graphic Designer   From PSEB at PTCP | Peshawar - 2024

- Developed applications using Flutter, focusing on functionality and UI/UX.
- Integrated ML models to enhance functionality and personalization.
- Gained experience in graphic design using Canva and Figma.

Flutter/Dart and Graphic Designer   Self - 2 years

- Developed applications using Flutter/Dart, implementing features such as Firebase, FCM, RESTful API, Google Maps, and State Management.
- Designed professional UIs, logos for apps, and posters using Figma and Canva.

SKILLS

Expert-Level • Flutter/Dart • Object Oriented Programming • UI/UX Design

Intermediate • Java • JavaScript • C++ • C# • SQL • WordPress • Theory of Automata
• Data Structure and Algorithms • Design and Analysis of Algorithms

Basic-Level • Kotlin • ASP.net • html • css • ejs • php • Open-GL

In Progress • MERN

PROJECTS

- **Courses Recommendation System:** Developed an AI-based recommendation system to suggest courses tailored to user interests.

- **Fast Food App:** Developed application enabling users to order from their preferred restaurants and track the delivery status in real-time using Google Maps

- **Chat App**: Built a real-time messaging app with support for text and image communication.

- **My Dictionary:** Created a feature-rich dictionary app with search-based words recommendations.

- **Dictionary Dataset for ML(Ai):** Developed a comprehensive English word dataset with detailed attributes, for ML models, NLP tasks, and academic research.

CERTIFICATIONS

- **Flutter Developer** – PTCP (Apprenticeship of PSDP under HEC, "Prime Minister's Initiatives - Support for IT Startups, Specialized IT Training, and Venture Capital") by PSEB.
- **Material Components for Flutter** – Coursera
- **Data Structure** – STEPIK

LANGUAGES

- **Urdu** (Native)
- **Punjabi** (Proficient)
- **English** (Fluent)

EDUCATION

BS Computer Science 2020 - 2024
Kohat University of Science and Technology
